Kaushiki Tripathi

+91-8081992550 | Portfolio | LinkedIn | GitHub | kaushikitripathi07@gmail.com

Professional Summary

Aspiring Software Developer focused on Full Stack Development, with hands-on experience building web applications using React.js, Node.js, Express.js, and MongoDB. Strong foundation in Data Structures & Algorithms, OOPs, and DBMS with experience in API development, testing, debugging, and deployment. Eager to contribute to impactful projects and build efficient, user-centric software solutions.

Skills

Programming Languages: C++,
Frontend Technologies: React.js, HTML, CSS, Tailwind CSS, JavaScript
Backend Technologies: Node.js, Express.js, REST APIs
Databases: SQL, MongoDB
Generative AI Technologies: RAG Pipelines, Semantic Search, Text Embeddings
DevOps & Tools: Git, GitHub, VS Code, Postman, Docker (Basics, Containerization)
Core Subjects: Data Structures & Algorithms, DBMS, OOPs, Operating Systems, Software Engineering

Projects

HabitFlow | *React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Recharts, Framer Motion, Google OAuth* - | Link

- Developed and deployed a full-stack habit tracking platform featuring personalized habit management, daily progress tracking, and user-specific data management.
- Built interactive analytics dashboards using Recharts and Framer Motion, featuring consistency trends, completion statistics, duration-based activity distributions, and monthly contribution heatmaps.
- Integrated JWT authentication and Google OAuth 2.0, alongside secure user access and backend synchronization for personalized habit tracking.
- Developed a responsive habit check-in system that reduces perceived response latency through immediate status updates, backend synchronization, and error handling.

ChatDocs | *React.js, Node.js, Express.js, MongoDB, Pinecone, Google Gemini API, OpenRouter* | Link

- Built and deployed a full-stack AI document assistant that enables users to upload PDF files and ask questions, using a Retrieval-Augmented Generation (RAG) pipeline.
- Engineered a document processing and retrieval pipeline involving PDF text extraction, chunking, Gemini-powered embeddings, and Pinecone vector search to retrieve contextually relevant document content.
- Integrated OpenRouter-powered LLM responses with Server-Sent Events (SSE) for real-time answer streaming, and implemented batched embedding generation with retry and backoff handling for Gemini API rate limits.
- Implemented page-aware retrieval to handle specific page and page-range queries, alongside semantic search for general questions and document-grounded responses.

Education

Pranveer Singh Institute of Technology 2022-2026
Bachelor of Technology in Information Technology *CGPA: 7.48*

St. Thomas School 2021-2022
Intermediate *Percentage: 75.5*

Achievements

- Achieved a 5-Star rating in Problem Solving on HackerRank | Link
- Secured 2nd position in a team quiz based on emerging technologies in PSIT out of 36 teams
- Led and coordinated one of the events at Tech Expo 2025, organized by PSIT.

Certifications

- Infosys Springboard – Programming Fundamentals (Python, HTML, CSS, JavaScript, DBMS) | Link
- Udemy – Machine Learning A-Z | Link
- HackerRank – Problem Solving & SQL | Link
